Creating a Basic Search

1. On the Basic Search Screen, enter your search terms in the **Find** field.

The screenshot shows the EBSCO Basic Search interface. At the top, there are navigation links: Sign In, Folder, Preferences, New Features!, Help, and Exit. Below these are buttons for Basic Search, Advanced Search, Visual Search, and Choose Databases. The user is identified as a 'Demonstration Customer'. The main search area has a 'New Search' tab and a 'Keyword' field. The 'Find' field contains 'American history'. Below it, the 'in' dropdown is set to 'Specific Database(s)'. The search results are limited to 'Academic Search Elite' and 'American Humanities Index'. The 'Limit your results' section shows 'Full Text' and 'Special limiters for Academic Search Elite' with fields for 'Publication' and 'Published Date'.

2. Use **Limiters** to narrow your search. For example:
 - Full Text – limits search results to full text articles.
 - Publication – limits search results to articles from a specific title.
3. Use **Expanders** to broaden your search:
 - Also search within the full text of the articles – expands search results by finding your term(s) within the full text of the articles.
 - Also search for related words – expands results to include synonyms and plurals.
 - Automatically “And” search terms – expands results by applying the **AND** operator between terms, e.g., enter **space shuttle** to retrieve results for **space** and **shuttle**.
4. Click the **Search** button. A Result List is displayed.
